

## SQL PROJECT – CREDIT CARD TRANSACTION ANALYSIS

- 1- Top 5 cities with highest spends and their percentage contribution of total credit card spends
- 2- Write a query to print highest spend month and amount spent in that month for each card type
- 3- Find the transaction details(all columns from the table) for each card type when it reaches a cumulative of 1000000 total spends(We should have 4 rows in the o/p one for each card type)
- 4- Find city which had lowest percentage spend for gold card type
- 5- Write a query to print 3 columns: city, highest\_expense\_type , lowest\_expense\_type (example format : Delhi , bills, Fuel)
- 6- What is the percentage contribution of spends by females for each expense type
- 7- Which card and expense type combination saw highest month over month growth in Jan-2014
- 8- During weekends which city has highest total spend to total no of transactions ratio .
- 9- Which city took least number of days to reach its 500th transaction after the first transaction in that city.
